The information, as provided, is for informational purposes only and should not be interpreted as complete, nor should it be considered legally binding. Coordination with both your state and the destination state plant regulatory agency listed above may be necessary to stay up-to-date on revised requirements.

NURSERY STOCK DEFINITION

Plants and plant products means all vegetable matter, including but not limited to trees, shrubs, vines, forages and farinaceous plants, grains, vegetables, cereals, and parts or plant products such as leaves, stems, branches, roots, fruits, flowers, bulbs, tubers, stolons, cuttings, buds, grafts, seeds, tree trunks and wood. **Vegetative propagative material** means all plants and plant products, trees, shrubs, vines, bulbs, cuttings, grafts, buds, and seeds cultivated, maintained for, or capable of propagation, distribution or sale.

GENERAL SHIPPING REQUIREMENTS

All plants and/or vegetative propagating material introduced into Puerto Rico must be free from sand, soil, earth, and other foreign matter and must be accompanied by an inspection certificate issued by the governmental authorities in charge of enforcing plant quarantine regulations in the state, territory or district in the U.S. from which the material comes. The certificate must bear the name of the state, territory, district or country where the material was cultivated; the name and address of the consignee and importer; and the accepted common name or scientific name of the plant. It must also indicate that the material was duly inspected and is apparently free of plant pests. The material must meet all applicable federal quarantines.

Vegetative propagating material of sugarcane and pineapple is prohibited *except* for introduction by Federal and/or Commonwealth government experiment stations and plant nurseries under special permit issued by the Secretary of Agriculture. All fruits and vegetables must be free from plants, plant parts or other foreign matter. The introduction of soil, earth, sand or other similar material is allowed only under permit granted by the Secretary of Agriculture.

PR - 2 of 4

The introduction of plant pests or live insects in any stage is prohibited unless a permit has been obtained previously from the Secretary of Agriculture. All public porters (ships, airlines, etc.) are subject to inspection.
