Subject: APHIS Establishes and Expands Quarantined Areas for Citrus Canker (*Xanthomonas citri* subsp. *citri*) in Texas

To: State, Tribal, and Territory Agricultural Regulatory Officials

Effective immediately, the Animal and Plant Health Inspection Service (APHIS) and the Texas Department of Agriculture (TDA) are establishing four new quarantined areas for citrus canker in Hidalgo County, Texas, and expanding one existing quarantined area for citrus canker in Cameron County, Texas, to prevent the spread of the disease.

This action is necessary because APHIS confirmed the positive identification of citrus canker in citrus trees from residential areas in the Hidalgo, McAllen, Pharr, and San Juan areas of Hidalgo County leading to new quarantined areas in the Lower Rio Grande Valley (LRGV). In addition, further detections of confirmed positive citrus canker in residential areas have expanded the quarantined area in the Rancho Viejo area of Cameron County in the LRGV. TDA has established intrastate quarantined areas for citrus canker that parallel the federal citrus canker regulatory requirements specified in [7 Code of Federal Regulations \(CFR\) § 301.75](#) *et seq.*

Under the current citrus canker quarantine regulations, the interstate movement of citrus plants and plant parts, other than commercially packed and disinfected citrus fruit, remains prohibited. Citrus nursery stock that is moved in accordance with regulations contained in 7 CFR § 301.75-6 may move from areas quarantined for citrus canker.

The establishment of these quarantined areas is reflected on the [APHIS citrus canker webpage](#), which also contains a description of all the current federal citrus canker quarantined areas. APHIS will publish a notice of this change in the *Federal Register*.

Plant Protection and Quarantine**

Federal Order

APHIS Establishes and Expands Quarantined Areas for Citrus Canker (*Xanthomonas citri* subsp. *citri*) in Texas

DA-2024-13
April 26, 2024

Effective immediately, this Federal Order establishes four new quarantined areas for citrus canker in portions of Hidalgo County, Texas, and expands one citrus canker quarantined area in Cameron County, Texas, to prevent the spread of citrus canker, which is caused by *Xanthomonas citri* subsp. *citri*¹. This action is in response to detections of citrus canker during routine surveys in Cameron and Hidalgo Counties. The Animal and Plant Health Inspection Service (APHIS) has determined that these areas in Texas meet the criteria in § 301.75-4(a) of the regulation to be designated as a quarantined area.

This Federal Order is issued in accordance with the regulatory authority provided by the Plant Protection Act of June 20, 2000, as amended, Section 412(a), 7 U.S.C. 7712(a). The Act authorizes the Secretary of Agriculture to prohibit or restrict the movement in interstate commerce of any plant, plant part, or article, if the Secretary determines the prohibition or restriction is necessary to prevent the dissemination of a plant pest within the United States. The regulatory authority provided by 7 U.S.C. 7754 allows the Secretary to issue orders to carry out this provision of the Plant Protection Act. This Federal Order is likewise issued pursuant to the regulations promulgated under the Plant Protection Act found at [7 Code of Federal Regulations \(CFR\) § 301.75 et. seq.](#)

This Federal Order revises the quarantined areas for citrus canker in Texas and supersedes the citrus canker Federal Order DA-2024-04 issued on February 12, 2024.

Addition of Quarantined Area

To prevent the spread of citrus canker, the Administrator of APHIS finds it necessary to regulate portions of the Hidalgo, McAllen, Pharr, and San Juan areas of Hidalgo County in the Lower Rio Grande Valley (LRGV). In addition, APHIS is expanding the quarantined area in the Rancho Viejo area of Cameron County, in the LRGV. Accordingly, and effective immediately, all interstate movement of regulated articles from these areas must be done in accordance with the regulations promulgated in the Plant Protection Act found at 7 CFR § 301.75 *et seq.*, and any applicable provisions of this Federal Order.

¹ Citrus canker is caused by *Xanthomonas citri* subsp. *citri*. The taxonomy of this pathogen has changed and includes the following designations (1) *Xanthomonas axonopodis* pv. *citri* (Xac A, A* and AW) with synonyms *X. citri* pv. *citri*, or *X. campestris* pv. *citri*, or *X. smithii* subsp. *citri* and (2) *X. axonopodis* pv. *aurantifolii* (Xac B & C) with a synonym *X. subsp. aurantifolii*.

The establishment of these quarantined areas is reflected on the [APHIS citrus canker webpage](#), which also contains a description of all the current federal citrus canker quarantined areas. APHIS will publish a notice of this change in the *Federal Register*.

Section 7 CFR § 301.75-4(a) allows the designation of less than an entire state as a citrus canker regulated area only when the Administrator of APHIS has determined this to be the case using a series of criteria, which is applicable here. Note that 7 CFR § 301.75-4(a)(2) requires that the state enforce an intrastate citrus canker quarantine that is equivalent to the federal citrus canker regulations, which has been confirmed by the State Plant Regulatory Official for Texas.

7 CFR § 301.75-4(b) enables the Administrator to designate new quarantined areas in accordance with 7 CFR 301.75-4(a) upon giving written notice of this designation to the owner or persons in possession of the non-quarantined area. This new area will be added to the quarantined list on the APHIS citrus canker webpage. Written notice will again be provided if an area is removed from said list.

7 CFR § 301.75-4(c) provides for the removal of an area from the quarantined list pending sufficient evidence that demonstrates the area has been free from infestation for a period of two years from the initial detection. The list will be changed, and the public informed of this change in accordance with the process noted in 7 CFR § 301.75-4(a).

For additional information regarding the citrus canker program, you may contact:

avraham.eitam@usda.gov

We continue to appreciate the cooperative relationship with state regulatory officials and the citrus industry in Texas in our ongoing efforts to prevent the spread of citrus canker.

Quarantined Areas

Changes to the quarantined areas can be found in blue.

Alabama:

Portions of the state as follows:

- **Baldwin County:** The entire county.

Florida:

The entire state.

Louisiana:

Portions of the state as follows:

- **Jefferson Parish:** The entire parish.
- **Lafourche Parish:** The entire parish.
- **Orleans Parish:** The entire parish.
- **Plaquemines Parish:** The entire parish.
- **St. Bernard Parish:** The entire parish.
- **St. Charles Parish:** The entire parish.
- **St. James Parish:** The entire parish.
- **St. John the Baptist Parish:** The entire parish.

Texas:

Portions of the state as follows:

Greater Houston Area Quarantines:

- **Richmond/Sugarland Area, Fort Bend and Harris Counties**
The quarantine can be described as: Starting at a point described as N29.714687 degrees and W95.601183 degrees, then East to a point described as N29.714926 degrees and W95.596480 degrees, then East to a point described as N29.715443 degrees and W95.592216 degrees, then North to a point described as N29.724614 degrees and W95.592457 degrees, then East to a point described as N29.724619 degrees and W95.588419 degrees, then East to a point described as N29.724099 degrees and W95.586635 degrees, then South East to a point described as N29.723488 degrees and W95.585469 degrees, then South East to a point described as N29.722239 degrees and W95.583800 degrees, then South East to a point described as N29.721458 degrees and W95.582811 degrees, then South East to a point described as N29.720877 degrees and W95.581550 degrees, then East to a point described as N29.720497 degrees and W95.580115 degrees, then East to a point described as N29.720456 degrees and W95.576856 degrees, then East to a point described as N29.720498 degrees and W95.571606 degrees, then South to a point described as N29.703905 degrees and W95.571267 degrees, then West to a point described as N29.703725 degrees and W95.592574 degrees, then South to a point described as N29.702909 degrees and W95.592552 degrees, then South East to a point described as N29.702268 degrees and W95.592099 degrees, then South to a point described as N29.700872 degrees and W95.592087 degrees, then South West to a point described as N29.700224 degrees and W95.592438 degrees, then South to a point described as N29.699226 degrees and W95.592420 degrees, then West to a point described as N29.699251 degrees and W95.593158 degrees, then North West to a point described as N29.699726 degrees and W95.593932 degrees, then West to a point described as N29.699881 degrees and W95.594389 degrees, then West to a point described as N29.699888 degrees and
