

FOR INFORMATION AND ACTION  
DA-2024-22  
June 18, 2024

Subject: APHIS Establishes a Host List for Regulated Articles for the Queensland Fruit Fly (*Bactrocera tryoni*)

To: State, Territory, and Tribal Agricultural Regulatory Officials

Effective immediately, the Animal and Plant Health Inspection Service (APHIS) established a host list for regulated articles for the Queensland fruit fly (QFF), *Bactrocera tryoni* (Froggatt). The berries, fruits, nuts, or vegetables of these hosts are regulated articles. QFF is a destructive fruit fly that is native to Australia and is not endemic to the United States. QFF attacks more than 120 plant species, including numerous commercial varieties of fruits and vegetables. This action is necessary due to the ongoing QFF quarantine in California, described in DA-2023-21, the first for this species in the Western Hemisphere. APHIS will use this list for domestic federal regulations when establishing quarantines for this pest.

APHIS will regulate the interstate movement of QFF regulated articles from all quarantined areas in the United States in accordance with [7 Code of Federal Regulations \(CFR\) 301.32 et seq.](#), and any applicable provisions of this and other Federal Orders. The berries, fruits, nuts, or vegetables of the plant species listed in the attached Federal Order are now regulated articles for QFF, and 7 CFR § 301.32-2 allows the weblisting of fruit fly regulated articles.

The QFF host list, the current QFF quarantine area, and this Federal Order are located on the [APHIS exotic fruit flies webpage](#). APHIS will follow this action by publishing a notice in the *Federal Register*.

Dr. Mark L Davidson  
Deputy Administrator  
Plant Protection and Quarantine

**United States Department of Agriculture  
Animal and Plant Health Inspection Service  
Plant Protection and Quarantine**

**Federal Order**

**Designation of Regulated Articles for the Queensland Fruit Fly (*Bactrocera tryoni*) for  
Federal Quarantine Regulations in the United States**

DA-2024-22  
June 18, 2024

Effective immediately, this Federal Order establishes a host list for regulated articles for the Queensland fruit fly (QFF), *Bactrocera tryoni* (Froggatt). The Animal and Plant Health Inspection Service (APHIS) will use this list for domestic federal regulations when establishing quarantines for this pest. Lists of hosts of regulated articles are generally known as regulated host lists or simply as host lists.

This Federal Order is issued pursuant to the regulatory authority provided by the Plant Protection Act (PPA) of June 20, 2000, as amended, Section 412(a), 7 U.S.C. 7712(a). The Act authorizes the Secretary of Agriculture to prohibit or restrict the movement in interstate commerce of any plant, plant part, or article if the Secretary determines the prohibition or restriction is necessary to prevent the dissemination of a plant pest within the United States. This Federal Order is also issued pursuant to the domestic fruit fly regulations promulgated under the PPA and found in [7 CFR 301.32 et seq.](#) (hereafter referred to as “the regulations”). QFF is native to Australia and is not endemic to the United States. Damage occurs when the female lays eggs in the fruit. These eggs hatch into larvae, which tunnel through the flesh of the fruit, making it unfit for consumption. QFF is known to attack numerous types of fruits and vegetables, including many important U.S. crops.

The attached list constitutes the full list of federally regulated host plants of QFF. These host plants have recorded infestations by QFF under natural field conditions. Unless proven otherwise, all cultivars, varieties, and hybrids of the plant species in the attached list are considered suitable hosts of QFF. The berries, fruits, nuts, or vegetables of the plant species listed in the attachment are now considered regulated articles for QFF. They are subject to all requirements of the regulations and applicable provisions of any applicable Federal Orders. The QFF host list, the current QFF quarantine area, and this Federal Order are located on the [APHIS exotic fruit flies webpage](#). APHIS will follow this action by publishing a notice in the *Federal Register*.

Each host in the attached list satisfies the definition and attributes of a suitable host as stipulated in:

- [International Plant Protection Convention. 2016. Determination of the host status of fruit to fruit flies \(Tephritidae\). International Standards for Phytosanitary Measures \(ISPM\) 37.](#)

- [APHIS. 2020. Imported Plant Commodity Pest Risk Assessment Framework.](#)

Effective immediately, all interstate movement of QFF regulated articles from the quarantined areas of the United States must be conducted in accordance with the regulations and any applicable Federal Orders.

For additional information on the Fruit Fly Exclusion and Detection program, please contact:

## Queensland Fruit Fly (QFF), *Bactrocera tryoni*, Regulated Host List, 2024

Effective June 18, 2024, the berries, fruits, nuts, or vegetables of the following plant species are now considered regulated articles for *B. tryoni* and are subject to the requirements of 7 CFR 301.32 and any applicable Federal Orders. All cultivars, varieties, and hybrids of the plant species listed herein are considered suitable hosts unless proven otherwise.

Each listed host plant has validated records of infestation by *B. tryoni* under natural field conditions and satisfies the definition and attributes of a suitable host plant in accordance with international regulatory standards.<sup>1</sup>

References documenting forced field infestation, laboratory infestation, or a mere listing as a host without verifiable infestation data are not included.

<i>Psidium guajava</i> L.	Common guava, guava, lemon guava, yellow guava	Amice and Sales, 1997 Andrewartha and Birch, 1984 Bateman, 1982 Campbell and Jessup, 2007 Dominiak <i>et al.</i> , 2020 Drew and Lloyd, 1987 Fitt, 1983 Fitt, 1986a Fitt, 1990 Fitt and O'Brien, 1985 Gibbs, 1967 Gilchrist and Ling, 2006 Leblanc <i>et al.</i> , 2012 Leblanc <i>et al.</i> , 2013 Lloyd <i>et al.</i> , 1986 Lloyd <i>et al.</i> , 2010 Lloyd <i>et al.</i> , 2013 Marsden, 2014 May, 1963 Prokopy <i>et al.</i> , 1999 Snowball, 1966 Snowball and Lukins, 1964 Sonleitner, 1973 Vargas <i>et al.</i> , 2007 Vargas <i>et al.</i> , 2012
<i>Punica granatum</i> L.	Pomegranate	Dominiak <i>et al.</i> , 2020 Leblanc <i>et al.</i> , 2012 Vargas <i>et al.</i> , 2007
<i>Pyrus communis</i> L.	Pear	Bateman, 1982 Bateman and Sonleitner, 1967 Dominiak <i>et al.</i> , 2020 Fitt, 1983 Fitt and O'Brien, 1985 Fletcher, 1973 Lloyd <i>et al.</i> , 2013 Maelzer, 1990 Pritchard, 1970 Prokopy and Fletcher, 1987 Spinner <i>et al.</i> , 2011 Weldon and Taylor, 2011
<i>Pyrus pyrifolia</i> (Burm. f.) Nakai	Asian pear, Chinese pear, Chinese sand pear, Japanese pear, nashi, nashi pear, Oriental pear, sand pear	Dominiak <i>et al.</i> , 2020 Spinner <i>et al.</i> , 2011

Scientific Name	Common Name	References
<i>Pyrus pyrifolia</i> (Burm. f.) Nakai var. <i>culta</i> (Makino) Nakai	Asian pear, Chinese pear, Chinese sand pear, Japanese pear, nashi, nashi pear, Oriental pear, sand pear	Friend, 1949 Weldon, 2005 Weldon and Meats
<i>Rauwenhoffia leichhardtii</i> Diels <sup>11</sup>	N/A	May, 1963
<i>Rosa</i> sp.	N/A	Dominiak <i>et al.</i> , 2018 May, 2022
<i>Rubus fruticosus</i> auct.	European blackberry	May, 1963
<i>Solanum betaceum</i> Cav.	Tree-tomato, tamarillo	NSW-DPI Agriculture, 1967
<i>Solanum lycopersicum</i> L.	Tomato	Bateman, 1982 Dominiak <i>et al.</i> , 2020 Fisher, 1994 Singh <i>et al.</i> , 2000
<i>Solanum lycopersicum</i> L. var. <i>lycopersicum</i>	Tomato	Fitt, 1983 Fitt, 1986b Leblanc <i>et al.</i> , 2012 May, 1963 Spinner <i>et al.</i> , 2011 Vargas <i>et al.</i> , 2007 Vargas <i>et al.</i> , 2012
<i>Solanum mauritianum</i> Scop.	Bugtree, ear-leaf nightshade, tobacco-wood, wild tobacco, wild tobacco-bush, wild tobacco-tree	Leblanc <i>et al.</i> , 2012
<i>Solanum melongena</i> L.	Eggplant	Leblanc <i>et al.</i> , 2012
<i>Solanum seaforthianum</i> Andrews	Black nightshade, Brazilian nightshade, climbing nightshade, deadly nightshade, Italian-jasmine, potato-creeper, St. Vincent-lilac	May, 1963
<i>Spondias dulcis</i> Sol. ex Parkinson	Ambarella, golden-apple, June plum, yellow-plum	Leblanc <i>et al.</i> , 2012 May, 1963 Vargas <i>et al.</i> , 2007 Vargas <i>et al.</i> , 2012
<i>Syzygium cumini</i> (L.) Skeels	Jaman, Java-plum, Malabar-plum, Portuguese-plum, rose-apple	Leblanc <i>et al.</i> , 2012 Vargas <i>et al.</i> , 2007

<sup>11</sup> Synonym of *Uvaria leichhardtii* (F. Muell.) L. L. Zhou, Y. C. F. Su & R. M. K. Saunders in The World Flora Online.

Scientific Name	Common Name	References
<i>Syzygium jambos</i> (L.) Alston	Malabar-plum, rose-apple	Amice and Sales, 1997 Leblanc <i>et al.</i> , 2012 Leblanc <i>et al.</i> , 2013 Vargas <i>et al.</i> , 2007
<i>Syzygium malaccense</i> (L.) Merr. & L. M. Perry	Malay-apple, mountain-apple, pink satin-ash, rose-apple	Amice and Sales, 1997 Leblanc <i>et al.</i> , 2012 Vargas <i>et al.</i> , 2007
<i>Syzygium paniculatum</i> Gaertn.	Magenta lilly-pilly	Lloyd <i>et al.</i> , 2013
<i>Syzygium smithii</i> (Poir.) Nied.	Lilly-pilly, monkey-apple	NSW-DPI Agriculture, 1968
<i>Terminalia catappa</i> L.	Country-almond, Indian-almond, Malabar-almond, sea-almond, tropical-almond	Amice and Sales, 1997 Fitt, 1983 Leblanc <i>et al.</i> , 2012 Leblanc <i>et al.</i> , 2013 Royer and Hancock, 2012 Vargas <i>et al.</i> , 2007 Vargas <i>et al.</i> , 2012
<i>Terminalia muelleri</i> Benth.	Australian-almond	May, 1963
<i>Thevetia peruviana</i> (Pers.) K. Schum.	Be-still-tree, yellow oleander	Leblanc <i>et al.</i> , 2012 Lloyd <i>et al.</i> , 2013
<i>Vaccinium</i> sp.	Blueberry	Campbell and Jessup, 2007
<i>Vitis vinifera</i> L.	Common grapevine, European grape, grape, grapevine	Dominiak <i>et al.</i> , 2020 NSW-DPI Agriculture, 1967
<i>Ximenia americana</i> L.	False sandalwood, tallownut, tallowwood, yellow-plum	Leblanc <i>et al.</i> , 2012
<i>Ziziphus mauritiana</i> Lam.	Chinese-apple, Chinese-date, common jujube, cottony jujube, Indian jujube, Indian-cherry, Indian-plum	Amice and Sales, 1997 Leblanc <i>et al.</i> , 2012

This list is a concise record of hosts found in the scientific literature. It is reviewed by APHIS Plant Protection and Quarantine's (PPQ) Fruit Fly cross functional working group, Imports Regulations and Manuals risk managers, and representatives of appropriate State Departments of Agriculture. Lists are reviewed every five to ten years.
