August 18, 2017

SUBJECT: APHIS Removes Mexican fruit fly (*Anastrepha ludens*) Quarantine in the Palmview Area of Hidalgo County, Texas

TO: State and Territory Agricultural Regulatory Officials

Effective August 8, 2017, the Animal and Plant Health Inspection Service (APHIS) and the Texas Department of Agriculture (TDA) removed the Mexican fruit fly (*Anastrepha ludens* or Mexfly) quarantine area in Palmview, Hidalgo, County, Texas.

On March 10, 2017, APHIS and TDA established a Mexfly quarantine in the Palmview area of Hidalgo County, Texas, restricting the interstate movement of regulated articles from this area to prevent the spread of Mexfly to noninfested areas of the United States. Since that time, APHIS has worked cooperatively with TDA and the Texas citrus industry to eradicate the transient Mexfly population through various control actions per program protocols. APHIS removed the quarantine after three Mexfly life-cycles elapsed with negative detections in this area. This removal of the quarantine area is reflected on the following designated website, which contains a description of all the current Federal fruit fly quarantine areas:

http://www.aphis.usda.gov/plant_health/plant_pest_info/fruit_flies/quarantine.shtml

For additional information on the Mexfly quarantine area, please contact National Fruit Fly Policy Manager John Stewart at 919-855-7426.
